

Saucony Motion Adjust

Description:

Offering great support and comfort, the Motion Adjust bra is ideal for all sorts of high intensity exercise. With great breathability and wicking properties.

Built for B to D cups, the molded liner wicks, separates, and successfully battles the bounce.

The Motion Adjust has the same fit and technologies as the Motion Sensor bra. The added features in the Motion Adjust are the straps which are both adjustable. The Motion Adjust has the ability to fit women for high impact sports up to a size 40DDD.

A great buy for exercising, this bra will give you support as well as keeping you comfortable at all times.

Features:

- Saucony's patented Performance Shape Technology™ - for amazing comfort and fit
- Flatlock Seams - provide less chafing and added comfort
- Stretchable, breathable molded cups and wicking liner - to keep you comfortable at all times
- Adjustable Velcro Straps - with back hook-and-eye closure for custom fit
- Stain Resistant Fabric

Saucony Motion Sensor

Description:

Stretchable, breathable molded cups. Breathable, wicking Sorbtek liner. Super comfort and support. Adjustable back with hook-and-eye for custom fit and chafe resistant flat-seam construction

Features:

- Saucony's patented Performance Shape Technology™
- Chafe resistant, flat-seam construction
- Stretchable, breathable molded cups and wicking liner
- Adjustable hook and eye closure for custom fit
- Stain resistant fabric
- Saucony reflective logo

PROS

- Good support
- Comfortable
- Breathable
- Cool
- Flattering
- Shapely
- Breathable
- Durable
- Easy to breastfeed in
- Lightweight
- Supportive enough for run
- Supportive for postnatal

CONS

- Straps do not lay flat

BEST USES

- High impact exercise
- Running
- Gym
- Low impact exercise
- Tennis

Comments about Saucony Motion Sensor:

- This Saucony Motion Sensor bra is the most comfortable sports bra I have ever owned. It is very supportive and I run long distance quite a bit. Fit wise, it is very true to size. I actually wear a 32D which is hard to find, but the 34C works really well in this bra as well.
- Very comfortable bra - but not chafe resistant for more than 5 miles running!! It rubs along the bottom of the front leaving a sore line across you!
- I run 3 miles without stopping a couple times a week, plus working out with weights 4 times a week. Larger chested. There's not a jogging bra that I found as good as this one. Did my own research, plus running mag article that recommended this one. Please believe me, I don't see how anyone could be disappointed.
- Doesn't have that "flat look" that most of my sports bras have. I can wear this bra under clothing anywhere, and still looks flattering.

Moving Comfort Maia

Description:

The Moving Comfort Maia Adjustable Strap High Impact Sports Bra, from the Moving Comfort Sports Bra Collection, is a high-impact sports bra designed to give you ultimate confidence during sports like running, tennis and volleyball. With a stretch microfiber outer layer and spacer fabric lining, this bra has a smooth line-free look under shirts. The seamless cups and underwire support on the Moving Comfort Maia Adjustable Strap High Impact Sports Bra give encapsulation and compression.

Features:

- Stretch microfiber outer fabrication
- Seamless molded cups
- Underwire support
- Internal spacer fabric lines cups and extends into straps to reinforce support and increase comfort
- Smooth, no-line look under shirts
- Adjustable shoulder straps are positioned to fully support the breasts, maximize shoulder comfort and allow for a full range of arm movement
- Three rows of hooks and eyes with three adjustment positions provide enhanced support and custom fit
- Encapsulation and compression
- Ideal for high-impact sports like running, volleyball and tennis

PROS

- Adjustable
- Breathable
- Comfortable
- Durable
- Good support
- Straps that do not slide

Moving Comfort Fiona

Description:

The Moving Comfort Fiona High Impact Sports Bra is an elegantly-engineered bra designed to give full-figure women the ultimate in high-impact support without underwire. With infinite front adjustability in the straps from doubled-back strong Velcro, this Moving Comfort bra can be dialed in to reach the perfect fit. Whether your exercise plans take you to the gym or out running on the open road, the Moving Comfort Fiona High Impact Sports Bra offers the most comfortable encapsulation and support you can find.

Features:

- Stretch microfiber outer fabrication
- Seamless molded cups
- Underwire support
- Internal spacer fabric lines cups and extends into straps to reinforce support and increase comfort
- Smooth, no-line look under shirts
- Adjustable shoulder straps are positioned to fully support the breasts, maximize shoulder comfort and allow for a full range of arm movement
- Three rows of hooks and eyes with three adjustment positions provide enhanced support and custom fit
- Encapsulation and compression
- Ideal for high-impact sports like running, volleyball and tennis

PROS

- Good support
- Straps that do not slide
- Comfortable
- Breathable
- Durable
- Good for running
- Maintains great shape
- Minimizes bust
- Supportive

CONS

- Uncomfortable
- Difficult To Get On/Off
-

BEST USES

- High impact exercise
- Low impact exercise
- Gym
- Running
- Tennis
- Trampoline
- Urban rebound classes

Comments about Moving Comfort Fiona:

- I began to take a high impact class at the gym and found that wearing two sports bras at the same time wasn't enough support. I purchased the Fiona and found sufficient support. I also go jogging and it works great. I'm a 36D and I can run comfortably now.

Moving Comfort Melbourne

Description:

The bra that made Moving Comfort famous! This smooth-front beauty looks deceptively simple, but inside, the fabulous M-frame offers high impact support and shaping.

Features:

- Stabilized straps offer added support and minimize movement
- Single-layer back for fast moisture transfer and drying
- Racer-back design offers support for non-slip security of straps, maximum shoulder comfort, and allows for a full range of arm movement
- Powermesh fabric lining and structured seaming work together to control and minimize movement
- M-frame with molded cups for shaping
- Shell: Coolmax® with 13% Lycra®, Interior Bra: 80% nylon / 20% spandex
B-C Cup / Medium Breasted / High Impact

PROS

- extremely comfortable...makes me feel as light as a feather

CONS

- None entered

BEST USES

- Everything

Comments about Moving Comfort Melbourne:

- By far the most comfortable bra I've ever worn...I was looking for a bra to wear when playing soccer, but I'm going to try to get away with wearing this bra as often as I can. I don't know how they did it...it feels like I'm not carrying my matching luggage with me anymore. Even the price is reasonable...I would have paid much more for them. I just wish there was a formal version...
